

Engineers · Surveyors · Planners · Environmental Scientists

STATEMENT OF QUALIFICATIONS

Gravatt Consulting Group, Inc. is an experienced team of civil engineers, planners, environmental scientists, land surveyors and project managers. Established in 1970, the Firm quickly developed a reputation for quality work and has continued to build on that reputation while providing a wide range of consulting services to private individuals, architects, developers, contractors, municipalities, state agencies and institutions throughout the tri-state area. In September 2006, Gravatt Consulting Group, in a joint venture with Phoenix, Arizona based architects, *Whitneybell Perry* established ***TerraScape Consulting***. The new engineering and planning firm addresses the growing need for experienced, full service consultants dedicated to the “New Urbanism” approach to land planning within America’s fifth largest city.

Throughout the Firm’s 37 years of operation, our consistent objective has been to respond to the specific requirements of our clients, both public and private by providing our clients with a level of service that is a necessity in today’s challenging land use environment.

Associates within the Firm possess extensive project experience and expertise in specific areas of site engineering, municipal consulting and planning services, environmental sciences, traffic engineering and surveying. From this experience, the company has compiled an impressive record and reputation for quality and innovation in their planning and design. Gravatt Consulting Group prides itself in its ability to meet client goals and schedules throughout the planning, approval and construction process, which often determines the financial success of a project. This combination of close personal service and practical engineering solutions is the cornerstone of many long-term client relationships, which Gravatt Consulting Group is most proud.

Our Municipal planning and design team contains professionals with years of experience and expertise in institutional design, planning, site engineering, environmental sciences, landscape architecture, open space, farmland preservation and acquisition, and land surveying. Additionally, our in-house staff includes experienced Municipal water and sanitary sewer and stormwater professionals. Our Municipal staff has served various municipal governments throughout New Jersey in the design and operation of water and sanitary sewer systems, stormwater management, reconstruction and rehabilitation of aging infrastructure, NJDEP permitting and record keeping.

Since its inception, the Firm has made a commitment to implementing and maintaining state of the art computerized hardware and software. Our design professionals utilize advanced, industry standard engineering design and mapping software for all of our projects.
